

The world's most innovative electric outboard.

eCycle's twin-prop outboard is now available. With a conventional rating of 6HP, the electric outboard's contra-rotating propellers provide the thrust equivalent of a 9.9HP gasoline outboard. It offers greater efficiency than any comparable product, at a competitive price.

THE NEW WAVE IN MARINE PROPULSION

FEATURES AND ADVANTAGES

- Brushless motor allows low speeds for trolling, with instant response
- High efficiency
- Lightweight
- Low maintenance
- Simple-to-use, push button power
- Salt water compatible
- Environmentally clean
- No fuel, zero emissions
Conforms to CARB emission standards
- Priced at \$3,295.00

SPECIFICATIONS

Model:	eCycle CRP Electric Outboard
Motor:	eCycle SolidSlot
Voltage:	24VDC
Max Current:	200A
HP (Rated):	6HP
Gear Ratio:	2:1
Props:	Front - eCycle 7.4" LH 3 Blade Rear - Solas7.25" RH 2 Blade
Thrust:	235lbs. static / 175lbs. dynamic
Weight:	40lbs.

Contra-rotating (CRP) technology was introduced in England about 150 years ago. It's been used in submarines, torpedoes and various sterndrive systems. CRP increases prop efficiency by 20%.
